

A Gift of An Education has been sent in your honor

NASAD NATENWA LEARNING CENTER Kachale Village, Zambia

University Presbyterian Church has worked with this former leper colony for many years. This year a team from our college ministry visited the village and found that the NASAD program has changed its focus. In the beginning, the emphasis was on helping the children of lepers. In recent years, many new families have moved to the community and the greatest priority is providing all of the children with an education beyond the primary school level. This gift will provide scholarships and funding for books, school supplies and uniforms that are essential in order for children from very poor families to hope for a future with more opportunities.
